

INDEX.

A.

ADDRESS delivered by the Hon. Jonathan Roberts, at the exhibition of the Philadelphia Society for promoting agriculture, 197, 206, 214.

AGRICULTURE, extracts from the second report on, by Henry Colman, 129. General remarks on, 203, 305. English, 243, 394. Business of, 293. On the measures of government as connected with, 314. State of, in France, 347. State of, in Scotland, 170, 261.

AGRICULTURAL Agency, 187. Chemistry, 226. Convention, 180. Meetings at Boston, 316, 371. Meetings in Richland District, S. C. 188. Publications, value of, 282. Prospects in Kentucky, 154. Reminiscences, 354. Schools, 265. Societies, utility of, 394. Surveys, 129. 282.

AGRICULTURAL FAIRS, benefits to be derived from, 121. Proposed one at Ellicott's Mills, 137. Description of the one at Easton, Md. by the editor, 177. Report of the proceedings at, distribution of premiums, &c. 212.

AGRICULTURAL SOCIETIES, of Albemarle, Va. annual meeting, 204. Of Charlottesville, Va. list of officers, 169. Of Fredericksburg, Va. show and fair, 204. Of Kent County, Md. premiums, 164. Cattle show and fair, 235. Maryland State, notice of first meeting, 409. Of Nelson Co. Ky., premiums given by, 250. Of New Jersey, extracts from Judge Buel's address to, 242. Of Philadelphia, proceedings of, 413. Of Queen Anne's county, Md. list of officers, &c. 250. Of Williamson County, Penn. proceedings of, 250.

ALCHYMY of the dust hole, 20.

ALLEN, A. B. on feeding swine, 309.

AMERICAN FARMERS, character of, 198.

AMERICAN INSTITUTE, fair of the, 228.

ANIMALS, treatment of, in France, 347.

ANTS & SPIDERS, remedy against, 179.

APPARATUS for cooking and steaming roots, 339.

APPLES, value of, for feeding stock, 3, 157. As food for horses, 109. Important facts in regard to keeping them sound for a long time, 124.

APPLE TREES, distance to be observed in planting, 44. To prevent the ravages of the "Borer," in, 172.

ARMY WORM, ravages of the, 171.

ARTICHOKE, ENGLISH, value of, as food for hogs, mode of cultivating, &c. 173. JERUSALEM, its history and mode of culture, 306, 402.

ASHES, different kinds of, 28. Useful in destroying insects, 38. For fruit trees, 385.

ASPARAGUS, how to raise, 389, 410.

ATMOSPHERE, remarks on, 373.

AYRSHIRE CATTLE, their great value, &c. 257.

B.

BACON, different kinds of, and how prepared, 374.

BAKEWELL SHEEP, on the value of, by the editor, 201 BALDWIN'S Portable press for hay, cotton, &c. 34. His corn and cob crusher, 257.

BARLEY, on the culture of, 202. Uses of, 379. Machine for hulling, 206. As food for cattle, 412.

BARNEY, JOHN, on the preservation and use of roots, 331.

BARNs of the German farmers, 198.

BAROMETER, use of the, 379.

BAULK, (in agriculture) explanation of the term, 379.

BEANS, harvesting, 165. Varieties and uses of, 380. On the cultivation of, 395 403.

BEANPODS poisonous to swine, 374.

BEEF, monopoly of, and combinations to resist it, 17. Pickle for, 244. To spice it Irish fashion, 290.

BEER, Spruce and ginger, to make, 399.

BEES, management of, 20, 262.

BEETS, Sugar, on the culture of, by M. S. Kirkbridge, 2.

Do. in Indiana, recommended, 4. Do. in Michigan, 12.

Do. in Massachusetts, 12. Value of, for fattening stock, 36. Manufacture of sugar from, in Louisiana, 58. On the cultivation of, by Christian Tablet, 61. Do. in Tennessee and Virginia, 67. Proper soil for, 86. Cost of raising, 101. Estimated expense of an acre of, 101, 149, 307. On the culture of, by Chas. P. Bosson, 146. Do. by the editor, 161, 265. Use of for feeding ewes, 173. Culture of in New York and Pennsylvania, 243. On the culture of by Jas. Ronaldson, 275, 285, 292. Do. by "A Farmer," 298. Do. by James Pedder, 299. Culture of, in Kentucky, 316. On the culture and product of, by James Gowen, 322. As food for stock, 332.—Culture of in Connecticut, 364. Notice of a rasp for crushing the roots of, 61.

BEMENT, C. N. on the culture of the Rohan potatoe, 179, 339.

BLACKBERRY SYRUP, recipe for making, 78.

BLACK TEETH in swine, remedy for, 75.

BLANTON, H. on the agricultural productions, and breeding of stock in Kentucky, 266.

BLIND STAGGERS, cure for, 181.

BLUE GRASS, on the saving and value of, 266.

BOHAN UPAS TREE, notice of, by John Smith, 59.

BOND, Dr. Thos. E., sr. on noxious weeds, and the means to be used for exterminating them, 43.

BONE MANURE, on the value of, 251, 393.

BORING, for water near Paris, 20.

BOTTLES IN HORSES, remedy for, 7. Use of lime in curing, 211.

BOSSON, Chas. P. on the culture of the sugar beet, and its value as food for cattle, 116.

BREAD, rice and potatoe, how made, 159.

BREEDING and rearing horses for agricultural purposes, 227.

BRISTLES, hogs, as manure, 211.

BROWN, T. H. on reclaiming wet meadows and swamp lands, 38.

BUCKWHEAT, on the cultivation of, 306.

BUEL, Judge, death of, 167. Extracts from his address to the agricultural Society of New Jersey, 242. On the way to make farming profitable, 590.

BULBOUS Flowering roots, on the culture of, 211.

BUTTER, process of making, by S. M. Weeks, 7. Recipe for salting, 51. Making in Holland, 57. Process of salting, 289. Winter, 503. To restore sweetness to tainted, 340. To facilitate the churning of, 407.

C.

CABBAGES, on planting out, &c. 186. As food for hogs, 348.

CALVES, on raising, by Minot Thayer, 46, 142. Proper treatment for, 404. Extraordinary precocity of one, 11.

CAMELLIAS, treatment of, 311.

CANADA THISTLE, description, and mode of destroying it, 43, 183.

CANALS, rates of toll in Ohio, 15. British and American, 25. List of, 31. And rail roads in New York, 15.

CANCER, cure for, 144.

CANKERWORM, on trees, how to destroy, 563.

CARMICHAEL, Wm. on curing hay, 394.

CARROTS, cultivation and product of, 322, 378. As food for horses, 340.

CASS, Gov. transmits a paper on the manufacture of wine from the myrtle in France, 148.

CATERPILLARS, to destroy, 378.

CATTLE, description of the mad itch in, and cure for, 190.

Sale of Henry Clay, Jr.'s. stock, 190. Prices of North Devon in England; on soiling; to remove vermin from, cure for hollow horn, 197. On stall feeding, 205. Remarks on the Durham short horn and north Devon by the editor, 209. Do. by Saml. D. Martin, 210. Form of, 219. Hardiness of the Durham, 286. Warm houses for, 236. Hardiness of 244. On the rearing and feeding of, 252. To prevent the hoove in, 254. General remarks on the value of the Ayrshire, 258. Estimate of the various breeds of, 267. List of medicines used in treatment of diseases in, 269, 275, 286, 293, 301, 308, 325, 334. On feeding, 269. Lice on, 20, 286. Extraordinary mortality of, 301. Remarks on neat, 308, 317. Superiority of the English; proper food for, 324. Valuable importation of, 377. General observations on, 397.—Cure for the warbles in, 402. Feeding on boiled barley, 412. Rules for selecting neat, 11. On feeding, 37. Remarks on short horn by G. B. S. 75. Do. by the editor, 89. Sale of Durham in Kentucky, 75. Weight of Devon, 105, 106. Superiority of Devons over short horns, 106. Importation of 102. Tuscany, 139. Great sale of, 142. Superiority of the Durhams over the Devons, 147.

CAULIFLOWER, cultivation of the, 277.

CHARCOAL, nutritive qualities of, 109. Use of in diseases of swine, 341.

CHEESE, potatoe, 186.

CHINCH BUG, ravages of in Alabama, 90. Natural history of, and plan for subduing, by J. W. Jefferys, 131, 178. Remarks on, by Agriculturist, 135. Ravages of, in N. Carolina, 401. Plans for preventing do, 228, 401.

CHINESE TREE CORN, on the cultivation of, by Edward P. Roberts, 84, 155. Do. by J. A. Songton, 114. Remarks on by the editor of the "Yankee Farmer," 131. Do. by Dr. Muse, 140. Specimen of, sent by G. Thorburn, 210.

CHLORIDE OF LIME, value of, 301.

CLAY, HENRY Jr. on food for stock, judicious rotation, farming in England. &c. &c. 245.

CLOVER, on the cultivation of, 140. Advantages of growing the red with orchard grass, by Doct. James Mease, 363.

CLOVER SEED, process of saving, 118, 182. Time and

mode of cutting, curing and cleansing, 118. Preparation of, 189.

COLES, Hon. Walter, on the tobacco trade of the country, 364.

COLMAN, HENRY, extracts from his report on the agriculture of Massachusetts, 129.

COLORING for walls, 159.

COMFORT OF ANIMALS, 109.

COMMERCE AND NAVIGATION of the U. S. 31, 261.

COMPOSITION for coloring and preserving gates, &c.

165.

COMPOSTS, preparation and uses of, 140.

CONVENTION OF TOBACCO PLANTERS, 297, 406.

CORN, notice of the Baden, 18. On late hoeing to protect from frosts, 91. Suckering, 109, 140. Large growth of in Arkansas, 114. On the culture of by Dr. Muse, 123. On cutting off, 123. Chinese tree, 84, 114, 151, 140, 155, 210. Cultivation of, by J. C. Walsh; do. by Wm. B. Clarke, 170. Great yield of, 173. On gathering, 185. Preparation of for seed, 189. Varieties of, 219. Curing the stalks of, 219. Mode of cultivating the brown, 235, 402. Machine for shelling and husking, 250. Baldwin's Crusher—value of cobs as food for stock, 28, 257. On the culture of, by W. Ingell, 276. Great crop of, 283. Husking and Shelling Machine, 284. Brooms, superior kind of, 297. On the cultivation of, from the Rural Library, 300. Selection of, for seed, 340. Preparation of seed, time of planting, &c., 356. Directions for planting to secure the greatest yield of, 363. Discussion on the cultivation of, before the Agricultural Meeting at Boston, 371. Notice of a new variety, 378. Plan of cultivation as pursued by a "Lover of Good Husbandry," 378. Preparation of soil for, mode of applying manure, &c., 389. Notices of Page's Machine for planting, 401. Manuring in the hill, 410.

CORN SHELLER, improved, 18, 34.

CORRESPONDENCE, between the Editor and Board of Health, on the subject of street manure and night soil, 27.

COTTON, prospects of, in Mississippi, 11. Statistics of, 12, 23, 36, 52. Crops of 1837-8, 60. Prospects of, in S. Carolina, 69. Circular, 74, 83. Exportation of, from 1819 to 1838, 79. Improved species of, discovered in Alabama, 91, 182. On the culture of, and some of the causes of failure, 91. Prospect of crop in Alabama, 102.

Growth of, in Arkansas, 114. On the culture of, 124. Twin, or Okra, 127, 158. Destruction of, by the worm, 147. Prospects of crops, 168. Exportation of, for ten years, 166. Merchants' and Planters' Convention in Macon, Georgia; crop of the U. S. States for 1838-9; suggestions for the planter, 193. Prospects of the crop in S. Carolina, 219. Report on the cultivation of, read before the Pee Dee Agricultural Society, 229. Nankin, 244. Trade of Mississippi, 267. Report of the Committee of the Agricultural Society of Alabama, on the Twin, or Okra, 268. Immense produce of seed from Texas, 268. Essentials to the successful growing of, 290. Trade of India, 315. Crops of the world, 340. Notice of a new machine for ginning, 373. Seeds of, as a manure, 388. Competition in the culture of, 388. Culture of, in India, 401. On stiff lands, 413.

COTTON LANDS, method of improving, 363.

COUNTRY GROCERIES, on their utility, and how far they may be restricted, 84.

COWS, valuable one, 20. On working them on farms, 61. Great yield of milk from a Durham, 89. On Multicaulis leaves as food for, 139. Remedy for their holding up milk, 141. New disease in, 141. To cure diseased throat of, 254. Great value of the Ayrshire, as milkers, 238. On stripping; winter product of a Devon, 333.

CROPS, prospects of, 59, 62, 75, 91, 317, 338.

CURRENTS, culture of, 924.

CUTTS, Samuel, on the proper material for, and construction of hedges, 404.

D.

DAIRY PRODUCE, high prices of, 102.

DAUGHTERS, advice to, 295.

DERBY, Mr. description of his farm, 348.

DEVON Cattle, weight of, 105, 106. Superiority over the short-horn, 106. Importation of, into New York, by Mr. Vernon, 147. Prices of, in England, 197.

DIARRHEA in horses, remedy for, 374.

DICTIONARY of terms used in Agriculture and its kindred sciences, 276, 285, 373, 379.

DISTEMPER in hogs, cure for, 20.

DITCHING and Banking Machine, notice of by the Editor, 289, 409.

CONTENTS.

DOMESTIC ECONOMY, from Colman's Survey, 37, 129.
DRAG LOG, description and use of, 357.
DRAINING land, good effects of, 114. As practised in England, 351, 404.
DRILLING versus BROADCASTING, 210.
DURHAM Cattle, sale of, in Kentucky, 75. Importation of, 107. Comparison between them and Devon, by Dr. J. B. Davis, 147. Notice of C. N. Bennett's Stock, 147. On the superiority of, by Samuel D. Martin, 210. Hardiness of, 236.
DUST, uses of, in London, 20.

E.

EARLY RISING, benefits of, 222.
ECONOMY in a family, 399.
EDITORIAL, address to readers. 1. On the high price of provisions, 1, 3—Make hay while the sun shines—On the use of wool, 2. On the value of apples for feeding stock, 3. Southdown and Bakewell Sheep—the evil of retail liquor stores and grog-shops, 4. On diseased peach trees, 5. On making pickles, 7. The crops in Maryland—raising sheep—loss of lambs—oxen, 9. Beef monopoly, combinations to resist it, 17. Improved Corn Sheller—Baden corn, 18. On Canals, their profits, &c., 25. On the culture of turnips, 26. On the influx of foreigners—sale of lumber, 27.
